

All-New

**SEED VAC**  
BULK SEED CONVEYOR

# VACUUM ATTACHMENT

**PREVENT SEED WASTE AND SAVE TIME WITH THE EXCLUSIVE VACUUM ATTACHMENT**

Clean out of your planter boxes or drill has never been easier! Leftover seed can simply be vacuumed out and blown right back into your bulk container -- preventing seed waste and saving you time.

Designed to help you get rid of seed bags by gently blowing bulk seed to your planter or drill at rates of 400 LBS/minute, the Seed Vac™ Bulk Seed conveyor can now be switched over to a high-powered vacuum system in less than a minute.

Included with the Vacuum Attachment are vacuum lines and a blower protection system that filters out dust and debris that could enter and damage your blower - protecting your investment over time.

## The Vacuum Attachment Goes On in 4 Easy Steps

# \$325.00

Available for all 2000 and newer Seed Vac Bulk Seed Conveyors.

- 1** Remove snap pins and pull off the plastic hopper.

- 2** Place vacuum box on the airlock and slide locking hooks around the rear airlock flange.

- 3** Pull the vacuum box forward and tighten the thumbscrew.

- 4** Connect vacuum lines to the vacuum box and filter canister. Start the Seed Vac and begin conveying.
